

**MADE FOR SMART, HEALTHY, AND ENERGY-SAVING BUILDINGS**

**KEY FACTS**

The IAQ Multisense Display is tested and certified by the RESET standard for accuracy, and fully compliant with the WELL v2 building standard for performance. The IAQ Multisense Display collects minute-by-minute readings and is directly exportable in formats recognized and supported by the WELL, RESET and LEED standards.

**FEATURES**

- Enhance the health and wellbeing of your employees, tenants, or clients
- Reduce rates of absenteeism and realise gains from happy and productive employees.
- Increase energy efficiency, reduce carbon emissions and reach your sustainability goals
- Leverage IAQ data to optimize HVAC systems for considerable energy savings
- Data accuracy and reliability guaranteed by best-in-class hardware and software.

**PRODUCT EXCELLENCE, EVERY STEP OF THE WAY**

Data accuracy and reliability guaranteed by best-in-class hardware and software.

- Sensing components made in Switzerland
- Individually calibrated monitors
- Tested against complex network environments for robust connectivity
- Extensive testing across 6,000 individual measurements
- RESET & BTL certified

**ROBUST QUALITY CONTROL PROCESS**

- Manufacturing facilities certified by Apple MFi, ISO-9001, ISO-14001, ISO- 27001, ISO-13485
- Custom designed testing chamber to ensure the accuracy and consistency of equipment testing
- 100% traceable production process via unique serial number

**ACCURATE MONITORING, NO CALIBRATION NEEDED**

With easily replaceable sensor modules, there is absolutely no need to recalibrate your IAQ Multisense Display. Simply replace the sensors in seconds for continuous and accurate monitoring with little to no maintenance.

	<b>IAQ MULTISENSE DISPLAY</b>	<b>CONVENTIONAL MONITORS</b>
Calibration Method	Sensor Replacement	Off-site Calibration
Expertise Required	Anyone	Trained Technicians
Calibration Cost	< £200	£1,000+
Time Spent	< 1 Minute	Weeks to Months

**CREATE CERTIFIED PERFORMANCE REPORTS**

The IAQ Multisense Display collects minute-by-minute readings and is directly exportable in formats recognized and supported by the WELL, RESET and LEED standards.

**MADE FOR SMART, HEALTHY, AND ENERGY-SAVING BUILDINGS**

### **MANAGE YOUR AIR WITH THE REAL TIME DASHBOARD**

Use the Dashboard to monitor and manage your devices in one portal.

- Monitor and manage multiple devices
- View real-time data Receive and trends notifications
- Identify sources of pollution
- Compare readings across devices
- Receive notifications
- Export historical data

### **SECURE, FLEXIBLE, CONNECTED**

Using end-to-end SSL/TLS encryption, the IAQ Multisense Display provides maximum security for data transfer. The IAQ Multisense Display supports Wi-Fi and ethernet for connectivity, as well as various network configurations, including company proxy servers, hidden SSIDs, and captive portals. Both Static IP and DHCP options are available.

### **POWERFUL AUTOMATION AND CONTROL**

Maximize the performance of your filtration and HVAC systems with flexible connectivity options. Seamlessly integrate to your building's automation control system through our open API, BACnet, and more.

- Cloud and Local MQTT
- API
- Modbus
- BACnet

### **SIMPLE INSTALLATION**

The IAQ Multisense Display is easily mounted onto any wall with just three screws. Power on and access your air quality data within minutes.

### **ADDITIONAL INFORMATION**

- Customizable Modules
- Wi-Fi Connection
- Ethernet Socket
- 8GB On-Board Memory
- Data Buffer
- Micro-SD Card
- 5200mAh Battery Up to 8 Hours of Battery Life
- 7" Full Colour Touchscreen
- Multiple Languages
